## PERSONAL PROJECTS

### Youtube clone (02/2023 - 03/2023)

- make a clone of YouTube and make all UI and UX of the project
- use rapid API to fetch data

### Memory-game (11/2022 - 11/2022)

- the game is to memorize the location of pairs of matching cards or tiles and then match them up by flipping them over two at a time
- Players flip over two cards at a time, attempting to find matching pairs. Players who successfully match a pair of cards remove them from the game. If the two cards do not match, the player must turn them back over and try again on their next turn

### Movie app (01/2023 - 01/2023)

- The project consists of one page that includes the place to search and the place to show the films
- The project is to enter the name of the movie or a famous word and show all the movies related to this word by using an external API
