

Amr Nabel

Senior Frontend Engineer (React | Next.js)

01159263972 | amr.nabel3993@gmail.com | Cairo, Nasr City | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Senior Frontend Engineer with 4+ years of hands-on experience delivering scalable, high-performance web applications and SaaS products using React, Next.js, and Firebase. Proven ability to lead frontend architecture, improve UX, and collaborate cross-functionally to ship features that drive business impact.

EXPERIENCE

Senior Frontend Engineer, AMK LLC, Cairo, Egypt

Oct 2024 — Present

Led the development of smart mobility and transportation platforms in Saudi Arabia, delivering real-time booking, GPS tracking, and payment integration for seamless rider and client experiences.

- Developed a shared mobility platform that connects riders and drivers across Saudi Arabia. Built smart booking interfaces with AI-powered seat selection, Integrated flexible payment options, Mixpanel analytics, and real-time ride tracking for a seamless user experience.
- Built and launched a transportation platform serving 10K+ users with real-time booking, location tracking, and multi-gateway payments.

Mid-Level Frontend Developer, Cooperation.org, Tucson (Remote)

Mar 2024 — Present

Led the development of two advanced platforms for verifiable credential management—one for individual resume creation and the other for business credentialing—leveraging blockchain-compatible verification, real-time features, and cloud integrations to modernize digital identity and professional recognition.

- Built a React- and Next.js-based resume platform supporting cryptographically signed credentials, Google Drive storage, PDF export, and real-time editing with Firebase backend.
- Developed a business-focused full-stack credential system using Next.js 14 and Firebase, featuring multi-type credentials, endorsement workflows, analytics dashboards, and secure OAuth authentication.
- Integrated W3C Verifiable Credentials and DID standards to ensure tamper-proof, blockchain-compatible verification and credential sharing.
- Implemented responsive, accessible UI with Material-UI, custom hooks, modular architecture, and advanced import/export capabilities for cross-platform interoperability.

Mid-Level Frontend Developer, El-Nozom, Cairo, Egypt

Apr 2024 — Aug 2024

Contributed to building a high-performance frontend system with real-time APIs, interactive dashboards, and admin tools to support efficient user management and data visualization.

- Developed a real-time API infrastructure with WebSockets and caching, and built an admin panel for streamlined operations.
- Created interactive Tree View visualizations and integrated analytics dashboards for fast, multi-source data reporting.

Frontend Developer, Atheel Contact Center, Cairo, Egypt

Jun 2023 — Dec 2024

Designed and developed key frontend features for CRM, ERP, and RTM applications, focusing on real-time interaction, user engagement, and operational efficiency across enterprise platforms.

- Built and deployed a Real-Time Monitoring (RTM) app for efficient agent tracking and quicker response times.
- Enhanced ERP and CRM platforms with real-time tools and workflow improvements, increasing productivity and efficiency.
- Developed an internal chat system using Socket.IO for seamless real-time communication.

EDUCATION

Aswan University, Aswan - Bachelor of Commerce, Accounting - (GPA: 3.2)

Sep 2019 — Jun 2022

ALX Africa, Cairo - Holberton School 12-month, Software Engineering programme - (GPA: 3)

Feb 2023 — Apr 2024

PROJECTS

egtrains, [Link](#)

Mar 2024 — Present

- A website that collects train information from Egyptian National Railways and displays it in a nice way. it's made using Nextjs and Selenium web scraping. you can use it to search your train schedule.

LinkedCreds, [Link](#)

Apr 2024 — Present

- Serverless platform for verifiable skill sharing and endorsement, implementing W3C VC standards and Firebase integration.

Resume Author, [Link](#)

Aug 2024 — Present

- SaaS resume builder with live editing, credential signing, and PDF export, built using Next.js 14 and Firebase.

LinkedTrust, [Link](#)

May 2023 — Dec 2023

- Web3-based trust platform enabling users to create verifiable claims and validate others' claims through blockchain-powered graph visualization.

SKILLS

Frontend : TypeScript, JavaScript, ReactJS, Next.js, Material-UI, UX, REST, SASS, Tailwind

Backend : Node.js, Express.js

State Management : Redux, Redux toolkit, React Context, Zustand

Data & Backend Services : Firebase, PostgreSQL, MySQL, MongoDB, GraphQL

Version Control : Git, Github, GitLab, CI/CD tools

Collaboration Tools : JIRA, Trello, Slack, Taiga
