

Amr Nabil

Frontend Engineer (React | Next.js | TypeScript)

01159263972 | amr.nabel3993@gmail.com | Cairo, Egypt | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Engineer with 4+ years of experience in TypeScript, React, and Next.js, specializing in SSR, ISR, component architecture, and performance optimization. Proven track record of launching products from 0 to 1, including a mobility platform serving 10K+ users and a blockchain-based credentialing system. Focused on scalable architecture, code splitting, lazy loading, and delivering maintainable frontend systems aligned with business goals.

EXPERIENCE

Senior Frontend Engineer | [Scalix](#) | Cairo, Egypt | Aug 2025 - Jan 2026

- Architected an end-to-end ERP ecosystem covering 6+ modules: production, warehouse logistics, workforce management, and multi-channel distribution for textile and garment manufacturing.
- Engineered real-time production monitoring workflows with seamless data flow across factory operations, reducing manual reporting overhead by ~40%.
- Applied code splitting and lazy loading across modules, improving initial load performance by ~35%.

Frontend Engineer | [Cooperation.org](#) | Tucson, USA (Remote) | Mar 2024 - Present (**Concurrent**)

- Delivered two scalable platforms for digital identity and credential management using React, Next.js (SSR/ISR), and Firebase, enabling issuance and verification of 2K+ digital credentials.
- Implemented W3C Verifiable Credentials (VC) and DID standards, enabling tamper-proof credential issuance and verification with OAuth and analytics integrations.
- Collaborated with cross-functional teams across product, backend, and design to ship production features in agile sprints, fully remote across multiple time zones.

Senior Frontend Engineer | [AMK LLC](#) | Cairo, Egypt | Feb 2024 - Jul 2025 (**Concurrent**)

- Scaled a smart mobility platform to 10K+ users with real-time GPS tracking, multi-gateway payments, and dynamic seat selection.
- Optimized rendering architecture (CSR with selective SSR) and introduced lazy loading, cutting average page load time by ~30%.
- Integrated Mixpanel analytics across the booking funnel, delivering insights that improved user retention by ~20%.

Frontend Developer | [Atheel Contact Center](#) | Cairo, Egypt | Jan 2023 - Jan 2024

- Developed CRM, ERP, and RTM systems used by 200+ agents, improving operational efficiency and response workflows across the platform.
- Engineered real-time agent tracking and internal chat using Socket.IO, reducing average support response time by ~25%.

EDUCATION

Software Engineering Programme (12-month) | [ALX Africa / Holberton School](#) | Cairo, Egypt | Feb 2023 - Apr 2024

GPA: 3.0 | Python, C, JavaScript, algorithms, data structures, system design, full-stack web development.

B.Com | [Aswan University](#) | Aswan, Egypt | Sep 2019 - Jun 2022

GPA: 3.2

VOLUNTEERING

Programming Lecturer | [Magdi Yacoub Heart Foundation](#) | Aswan, Egypt | Apr 2023 - Dec 2023

- Designed and delivered technical education programs for non-technical staff at the largest heart foundation in the Middle East, covering programming fundamentals and digital literacy.

SKILLS

Frontend: TypeScript, React, Next.js, SSR, ISR, CSR, Code Splitting, Lazy Loading, Responsive Design, Accessibility, MUI

Architecture: Component Architecture, Performance Optimization, Scalable UI Systems

State Management: Redux, Redux Toolkit, React Context, Zustand

Backend & Data: Node.js, Express.js, Firebase, PostgreSQL, MySQL, MongoDB, GraphQL

Tooling: Git, GitHub, GitLab, CI/CD, Vercel, Docker, Figma, Postman, Sentry, JIRA, Slack

Testing: Jest, React Testing Library, Cypress

Languages: Arabic (Native), English (Fluent)
