

Amr Nabel

Senior Full-Stack Engineer (React | Next.js | Node.js)

+20 115 926 3972 | amr.nabel3993@gmail.com | Cairo, Nasr City, Egypt | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 5+ years of experience architecting high-performance web applications, ERP ecosystems, and B2B/e-commerce platforms across mobility, textile manufacturing, and decentralized identity sectors. Skilled across the full stack in React, Next.js, TypeScript, and Node.js (NestJS, Hono), with a track record of leading platforms end to end, from architecture through production, for clients in the Saudi and GCC markets.

EXPERIENCE

Senior Full-Stack Engineer, ASAS Group Company, Cairo, Egypt

Apr 2026 - Present

Lead full-stack development of two production platforms for the Saudi and GCC markets, owning architecture and delivery across frontend, backend, payments, and regulatory compliance.

- Architected and built Asas Gate, a bilingual (Arabic-first, RTL) B2B marketplace connecting Gulf buyers and manufacturers, spanning a public buyer storefront, a supplier/admin dashboard, and a NestJS backend covering catalog, RFQ and quotations, orders, payments, escrow, and real-time messaging.
- Migrated ASAS Online, a Saudi/GCC e-commerce platform, off a hosted SaaS provider onto a custom Next.js and Hono stack while preserving over 2,000 live URLs and existing SEO rankings, and implemented ZATCA Phase 2 e-invoicing with UBL XML generation and cryptographic stamping.
- Integrated regional payment gateways (Tap, Paymob, Tabby, Tamara) and shipping carriers (Torod, SMSA) using idempotent webhook processing and per-leg shipment tracking, including reverse logistics for returns.
- Delivered full bilingual and RTL support across both platforms (14 locales, multi-currency pricing) backed by CI/CD pipelines with blue-green deployments and automated test suites covering over 1,300 cases.

Senior Frontend Engineer, Scalix, Cairo, Egypt

Aug 2025 - Jan 2026

Led the end-to-end design and development of a custom ERP ecosystem for the textile and garment industry, digitizing operations from raw material processing through final product distribution and workforce management.

- Architected and deployed Scalix, an end-to-end ERP platform built from the ground up to digitize the textile and ready-made garment manufacturing lifecycle.
- Built integrated modules for fabric production, garment assembly, and real-time production line monitoring, connecting the factory floor to management in real time.
- Developed management tools for warehouse logistics, workforce coordination, and multi-channel shipping to automate supply chain operations and order fulfillment.

Senior Frontend Engineer, AMK LLC, Cairo, Egypt

Oct 2024 - Jul 2025

Led development of smart mobility and transportation platforms in Saudi Arabia, delivering real-time booking, GPS tracking, and payment integration for riders and clients.

- Developed a shared mobility platform connecting riders and drivers across Saudi Arabia, including AI-assisted seat selection, flexible payment options, Mixpanel analytics, and real-time ride tracking.
- Built and launched a transportation platform serving over 10,000 users with real-time booking, location tracking, and multi-gateway payments.

Senior Frontend Engineer, Cooperation.org, Tucson, Arizona (Remote)

Mar 2024 - Present

Led development of two verifiable-credential platforms, one for individual resume creation and one for business credentialing, using blockchain-compatible verification and cloud integrations to modernize digital identity.

- Built a React and Next.js resume platform supporting cryptographically signed credentials, Google Drive storage, PDF export, and real-time editing on a Firebase backend.
- Developed a business credentialing system using Next.js 14 and Firebase, with multi-type credentials, endorsement workflows, analytics dashboards, and secure OAuth authentication.
- Integrated W3C Verifiable Credentials and DID standards for tamper-proof, blockchain-compatible verification and credential sharing.
- Implemented a responsive, accessible UI with Material-UI, custom hooks, and modular architecture, including import and export tools for cross-platform interoperability.

Mid-Level Frontend Developer, El-Nozom, Cairo, Egypt

Jan 2023 - Apr 2024

Contributed to a high-performance frontend system with real-time APIs, interactive dashboards, and admin tools for user management and data visualization.

- Developed a real-time API infrastructure using WebSockets and caching, and built an admin panel for streamlined operations.
- Created interactive dashboards and data visualizations using charting libraries for analytics reporting.

Frontend Developer, Atheel Contact Center, Cairo, Egypt Jan 2022 - Dec 2023

Designed and developed frontend features for CRM, ERP, and real-time monitoring applications, focused on user engagement and operational efficiency.

- Built and deployed a real-time monitoring application for agent tracking and faster response times.
- Enhanced ERP and CRM platforms with real-time tools and workflow improvements that increased productivity.
- Developed an internal chat system using Socket.IO for real-time communication.

EDUCATION

Aswan University, Aswan, Egypt Sep 2019 - Jun 2022

Bachelor of Commerce, Accounting (GPA: 3.2)

ALX Africa (Holberton School), Cairo, Egypt Feb 2023 - Apr 2024

Software Engineering Programme, 12 months (GPA: 3.0)

PROJECTS

Mentra 2026 - Present

MENA-focused mentorship marketplace pairing paid one-to-one voice and video sessions with human mentors and an on-demand Arabic-speaking AI voice mentor, with payments, recordings, feedback, and payouts built in.

egtrains Mar 2024 - Present

An app providing route information for Egyptian National Railways services across major stations in Egypt.

Resume Author Aug 2024 - Present

SaaS resume builder with live editing, credential signing, and PDF export.

Camelo Oct 2024 - Dec 2024

Smart transportation platform offering reliable airport transfers and scheduled rides.

SKILLS

Frontend: TypeScript, React, Next.js, REST, Tailwind CSS, MUI, shadcn/ui

State Management: Redux, Redux Toolkit, React Context, Zustand, TanStack Query

Backend: Node.js, Express.js, NestJS, Hono, Fastify

Data & Storage: PostgreSQL, MySQL, MongoDB, Firebase, GraphQL, Prisma, TypeORM, Redis, Elasticsearch

Payments & Integrations: Paymob, Tap, Tabby, Tamara, Google OAuth, Socket.IO, Firebase Push Notifications

DevOps & Testing: Docker, GitHub Actions (CI/CD), Vitest, Playwright, Jest

Version Control: Git, GitHub, GitLab

Collaboration Tools: JIRA, Trello, Slack, Taiga
